FALL 2025

STETTLER COUNTY VOTES!

ELECTION DAY
OCTOBER 20

PAGE 6

**Tax Payment
Deadline:
October 31,
2025**

TAX PAYMENT DEADLINE: FRIDAY, OCTOBER 31, 2025

The 2025 County of Stettler Tax Payment Deadline is Friday, October 31, 2025 (the last working day in October).

A 10% penalty is applied on November 1 to all unpaid 2024 taxes.

Accepted methods of payment:

- Cash
- Cheque
- Interac
- *Online Banking
(Please choose 'Tax' and your Roll Number)
*Online Banking can take 2-3 days to process, allow time.
- At most financial institutions

Another method of payment to consider is setting up an ONLINE BANKING PRE-AUTHORIZED – Autopay, through our Tax Installment Payment Program (TIPP). This program will spread tax payments out over 12 months.

In order to qualify for the TIPPS program, your taxes have to be at a zero balance. Application forms must

be received prior to December 15. The amount of the monthly tax payment is determined from your previous years taxes. For example, a tax bill of \$1,200 would be divided by 12 payments of \$100 per month. The payment of \$100 would begin in January and continue until the current year's taxes are levied. The balance of the year would be recalculated to equal what is left owing, to come to a zero balance at the end of the year.

We typically try to take payments on the first of each month. If you happen to miss two payments, you will be taken off the TIPPS program. Please contact our office for an application.

Tax payments continue to be collected at the County Administration Building at 6602 – 44 Avenue, Stettler, Alberta, Monday through Friday from 8:30 AM - 4:30 PM.

Please consider receiving your tax notices by email/electronic means. Call us at 403-742-4441 to find out how.

INTRO

“Freedom is the right to be wrong, not the right to do wrong.” – John Diefenbaker

These words remind us democracy is not perfect, but it thrives when citizens are engaged. One of the most powerful expressions of that engagement is the simple act of casting a ballot. And while provincial and federal elections tend to capture the spotlight, it is in municipal elections that your vote carries the most immediate and tangible impact. Make casting your vote a priority on October 20.

Local government is the closest form of governance to the people. Decisions made at the municipal level shape the services and infrastructure that touch our lives every single day. From the condition of our roads, to the safety of our water, to the recreation facilities and community halls we gather in, these are choices that directly affect our families, our farms, our businesses, and our quality of life.

Municipal elections often see lower voter turnout than those held at higher levels of government. That means each ballot cast is amplified. In fact, outcomes here can be decided by just a handful of votes. Unlike national elections, where your vote might feel like one among millions, in a rural community your single ballot can truly tip the balance.

Voting is also about ensuring your voice is represented. By participating, you send a clear message about what matters most to you and your neighbours. You help choose leaders who will weigh difficult decisions about budgets, bylaws, infrastructure, and priorities. These decisions always come with trade-offs and responsibilities. If you do not vote, you allow others to make those choices without your input.

Diefenbaker’s words remind us that freedom carries both rights and responsibilities. We may not always agree with every decision made by our leaders, but our ability to shape those decisions begins at the ballot box. By voting, you embrace the responsibility of guiding your community’s future, safeguarding its strengths, addressing its challenges, and building on its opportunities.

So, when election day comes, please remember: the power to influence the direction of your community is not in the hands of a few, but in the collective hands of its voters. In a municipal election, your vote is not just symbolic, it is essential.

REEVE'S RAMBLINGS

Larry Clarke - Reeve, County of Stettler

As I look out the window and the thermometer on September 3, 2025 the temperature is a cool 9°C but the afternoon's temperature feels more like mid summer. Kids are back to school, combines are working hard well into the night taking off this year's crop and we are marching into fall and the end of the 2021 to 2025 term for Municipal Councillors. This will bring change to the County of Stettler as two Councillors have stated they will be retiring at the end of this term.

I would like to thank Councillors Les Stulberg and Ernie Gendre for the time, dedication and commitment they have shown to the County of Stettler ratepayers, and to committees they have sat on, representing the County of Stettler over their multiple terms. I do not know who has filed papers or intends to run but thank you to all candidates for putting forward your name and time to possibly represent the County of Stettler.

We have had a busy summer with many projects on the go. Bridge replacements have started with one completed by a contractor and the other two to be coordinated and installed by the County of Stettler utilizing contractor services and County services to complete the projects within approved budgets.

These bridges are inspected for conditions yearly and are load-rated based on engineering specifications with several of our aging infrastructure requiring de-rating to acceptable road limits, forcing some to be closed or dropped to a 10-tonne limit which prohibits graders or even a fully loaded school bus to cross. For

everyone's public safety, please ensure these ratings are adhered to. We as Council lobby, and staff works with Alberta Transportation to change out and update these bridges.

This summer we have also changed from seven to nine grader beats and have designated two graders to high use haul routes which will see road maintenance every ten days. This increased maintenance along with current gravel specs and programs will bring roads into a more manageable basis especially with incremental changes in weather and road conditions. This will also be represented in the updated Strategic Plan. Roadside mowing has seen challenging times with weather, soft shoulder conditions and very favourable grass and sweet clover growing conditions. Progress is being made to ensure ditches will be in shape for upcoming winter conditions. Changes have been made in Agricultural Services and Public Works to better focus departments on relevant issues regarding vegetation on roads. Roads are one of the largest assets and aging infrastructure of the County of Stettler and require changing maintenance procedures to meet current loads, level of usage and weather patterns.

Our move towards a Fire Commission is well underway. Equipment installs are currently being completed in the newly leased fire hall while inventory of all regional equipment is being completed. The new hall should be functional in October.

This fire commission station will work closely with Stations 2-Big Valley, 3-Donalda and 4-Byemoor,

REEVE'S RAMBLINGS

ensuring coverage is supplied to all commission members outside of the Stettler boundaries. County of Stettler Fire Manager Ivan Dykstra and County Fire Chief Troy Auton will be at the helm, and our dedicated firefighter volunteers from all of our communities will be ensuring our communities are well protected. The new commission will be working with other municipalities through updated mutual aid agreements, ensuring we are a municipal partner in fire protection.

These changes will come with additional costs but will better represent all members of the commission throughout our region, and County of Stettler residents.

Many of our neighbouring municipalities have similarly taken this step with very successful outcomes. Please be assured fire protection will continue to be delivered through the Stettler Regional Fire Department until the new governance model is in place, ensuring all residents continue to receive the same high standard of emergency service throughout the transition.

Please drive safely on our very busy roads, be patient with construction and agricultural activities. As always, please treat County of Stettler staff and all of our wonderful business frontline workers with respect as you would your neighbours, as they are truly your neighbors.

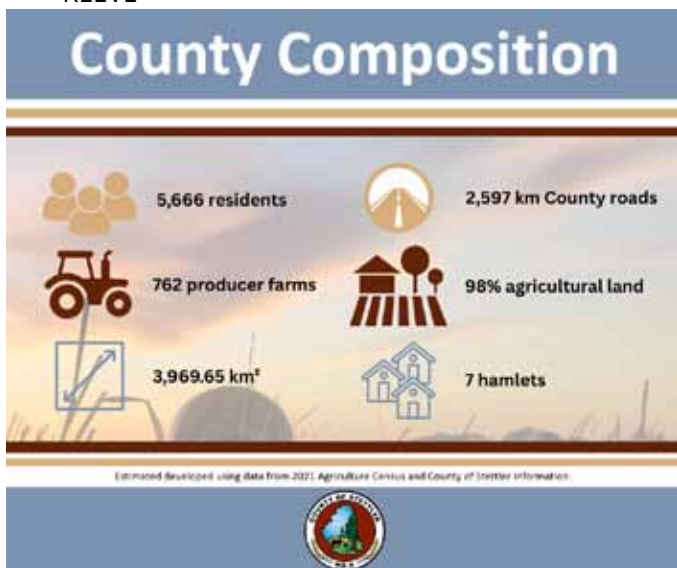

Larry Clarke,
REEVE

The Stettler County Fair and Rodeo Pancake Breakfast welcomed over 500 people on August 1.

Reeve Clarke congratulating Summer Village of White Sands Mayor Lorne Thurston on his retirement, and thanking him for his many years of public service, and his important work on so many community advancements and committees.

BUFFALO LAKE PUBLIC ACCESS ENHANCEMENT PROJECT

•SECOND OPEN HOUSE

The County of Stettler No. 6 is hosting the second open house on Wednesday, October 1, 2025 at the Erskine IOOF Hall between 4 p.m. and 7 p.m. You are invited to attend and review concepts that have been created for each site.

Parkland Community Planning Services (PCPS) has been engaged to assist in the creation of development concepts for three existing public access sites on the south side of Buffalo Lake. The three sites are County owned lands located in the Scenic Sands subdivision, the Buffalo Lake Meadows subdivision, and the Buffalo View Estates marina site.

The project will identify the types of facilities that can be developed at each site to enhance and facilitate public access to the lake and support various recreational activities that take place on the lake throughout the year.

Community involvement is vital to the success of this project. We invite residents and visitors to share their thoughts and feedback on the types of facilities and enhancements that may be desired.

More information about the project can be found on the County of Stettler website at www.stettlercounty.ca/buffalolakeaccess. Please visit our website for updates, materials for review, and opportunities to participate in the planning process.

Your insights will help shape the future of Buffalo Lake's recreational access at the three locations. To contribute comments and ideas, please use the comment form on the website or email buffaloaccess@stettlercounty.ca.

THE DIRT ON SOIL CONSERVATION

December 5 is World Soil Day!

Soil might be far from our minds, but it is important to honor soil. World Soil Day 2025 and its campaign underscore the importance of accurate soil data and information in understanding soils characteristics and supporting informed decision-making on sustainable soil management for food security. This highlights the significance of soil as the source of our food. Essentially, soil is the starting point for everything.

While soil health and conservation are keystone to productive land, concerns surrounding management practices negatively impacting soil retention became most evident in the 1930s. This period was named the “dirty thirties” as a result of major soil loss from winds that created “black blizzards”.

As a consequence, legislation was enacted in 1935 starting with the Prairie Farm Rehabilitation Act in conjunction with the Control of Soil Drifting Act, which were significant as the responsibility of soil conservation was clearly designated as that of whoever was occupying the land. Years later, in 1962, the Soil Conservation Act was passed, to provide a clearer definition of soil conservation. Then, in 1988, Agricultural Service Boards (ASBs) requested the act be further refined and reinforced for more effective

legislation. The act was most recently revised effective November 16, 2022.

Soil formation is a very slow process, and just one inch of topsoil (which holds the most nutrients), can take over 500 years! This is significant when comparing how much soil can be blown off or washed off the land in a matter of seconds. This soil loss cannot be recovered in our lifetime and severely threatens the sustainability of food production world-wide.

The Soil Conservation Act plays a crucial role in preserving Alberta’s agricultural land base and ensuring the long-term productivity of the farming sector. The act mandates that landholders must prevent soil loss or deterioration from happening, or put a stop to it if it’s already in progress. By implementing effective soil conservation practices, we can safeguard our land and protect the long-term productivity of Alberta’s agricultural land base, ensuring sustainable food production for generations to come.

Report concerns regarding soil erosion to the Agricultural Services Department:
asb@stettlercounty.ca or call 403-742-4441.

COMMUNITY INVESTMENT PROGRAM

Deadline: December 31, 2025

The County of Stettler recognizes that County community organizations should be supported in principle and with resources when it comes to assisting with the increasing costs of putting on community events.

The Community Investment Program is new to the County of Stettler in the way that it will manage these ongoing requests. Funding under this program is one time and is not to be relied upon as a continuing source of income. Council fully expects community organizations to be self-sustaining and to develop working relationships with contributing partners.

- **Applicants can only submit one application annually**
- **Must benefit the community**
- **Provide community involvement and support**
- **Have long term viability**
- **Program or event must be open to the public**
- **County of Stettler will be recognized as a source of funding**

Application forms can be found on the County of Stettler website www.stettlercounty.ca.

If you have any questions, please contact Lorraine Hankins at 403-742-4441, ext. 109, at any time, or email recreation@stettlercounty.ca

Our next deadline for intake for events happening in the 1st half of 2026 is December 31, 2025.

WE ARE NOW ACCEPTING SNOWPLOWING PRIVATE LANEWAY APPLICATIONS FOR 2025/2026

Please have your signed agreement in to our office prior to October 31, 2025

The County of Stettler is pleased to continue to offer the service of snowplowing residential lanes and driveways to qualifying residents within the County. Please apply as soon as possible. The process is as follows:

1. Complete the Hold Harmless Agreement for Grading / Snowplow Private Laneways – Form No. 2006, which can be found on our website www.stettlercounty.ca or at the County Shop located at 19561 TWP RD 38-4. Applicants can call 403-742-4441 or email pwoffice@stettlercounty.ca to complete the application process.
2. Please ensure all of the information on the application is filled in correctly.
3. If you are renting your residence, please ensure that both yourself and the landowner have signed the agreement.
4. Submit your application with the **administration fee of \$100.00** (including GST). An application is required for each address requesting snowplowing.
5. **Cost for each service is \$100 for the first 1/4 mile, additional \$50 per quarter mile after that.**
6. Your address will then be put on the list for an inspection to determine if it is suitable for equipment and to identify any hazards/safety concerns (if there is heavy snowfall, the inspection may not be able to be completed, please submit prior to snowfall). If appropriate, County staff may ask that you to rectify the issue and then re-inspect once complete.
7. If approved, you will then receive a “flag” to be displayed visible to the grader operator and your laneway will be added to the snow removal list for future snow falls of 2025/2026.
8. The County is unable to provide snowplowing services to bins, haystacks or corrals.
9. The County is unable to provide snowplowing services within Hamlets or Multi-lot Subdivisions.

Remember, application deadline is October 31, 2025. Thank you very much for your timely cooperation. See you when the snow flies.

SMRWSC AWARDED PRESTIGIOUS 'MINISTER'S AWARD' FOR PARTNERSHIP

The Shirley McClellan Regional Water Services Commission (SMRWSC) has been awarded the Alberta Minister's Award for Municipal and Public Library Excellence in the Partnership Category, for its groundbreaking collaboration in delivering one of the longest regional potable water systems in Alberta.

In the heart of East Central Alberta, thirteen municipalities came together with a shared vision: to bring safe, reliable drinking water to every corner of their region. Since its formation in 2007, the SMRWSC has united these communities under a single purpose, and the results speak for themselves.

Sourcing water from the Red Deer River and treated in Stettler, the Commission has constructed nearly 300 kilometres of pipeline since 2009. Today, it provides fresh, clean water to thousands of residents, farms, ranches, villages, hamlets, and summer communities.

Through its phased expansion, the SMRWSC has extended service to communities including Big Valley, Donalda, Monitor, Pemukan, White Sands, Brownfield, Rochon Sands, and beyond. By 2025, the system will reach Bawlf, Rosalind, and Compeer, further expanding its reach across East Central Alberta.

"This project is about more than infrastructure," said Reeve Larry Clarke, Chairperson for the SMRWSC. "It means peace

of mind for farmers filling a trough, security for ranchers ensuring livestock have clean water, and confidence for families who can rely on safe, great-tasting water straight from the tap. Every school, seniors centre, rink, business, and home connected to this system benefits from the reliability and safety that comes from regional cooperation."

Nearly 3,000 people are now served, with half a million cubic metres of water distributed annually. The Commission's success has improved public health, strengthened fire protection, supported economic development, and demonstrated the power of partnership among municipalities.

The Minister's Award recognizes initiatives that could not have been achieved by one municipality alone. The SMRWSC is a model of what's possible when rural communities share governance, funding, and a commitment to sustainability.

The County of Stettler administers the SMRWSC. Yvette Cassidy, CAO for the County is the Manager of the SMRWSC, and our Environmental Services staff operate and maintain the SMRWSC.

The Shirley McClellan Regional Water Services Commission (SMRWSC) is a collaborative effort between 13 municipalities, each playing an equal role in its operation and governance. Every member municipality actively participates in board meetings and decision-making, ensuring a shared commitment to providing safe, reliable potable water.

Member Municipalities:

1. County of Stettler No. 6
2. County of Paintearth No. 18
3. Special Areas Board
4. Town of Castor
5. Town of Coronation
6. Village of Bawlf
7. Village of Big Valley
8. Village of Consort
9. Village of Donalda
10. Village of Veteran
11. Village of Rosalind
12. Summer Village of Rochon Sands
13. Summer Village of White Sands

While all members have an equal voice in governance, the County of Stettler is responsible for managing and administering the SMRWSC's operations, ensuring efficiency and accountability in delivering potable water to the region.

Shirley McClellan Regional Water Services Commission (SMRWSC) Timeline

Formation & Legislative Approval:

- October 1, 2007 – SMRWSC formed by Order in Council.
- December 7, 2007 – Royal Assent granted to the East Central Regional Water Authorization Act, allowing inter-basin water transfers.

Infrastructure Development:

- 2008-2010 – Phase 1: 153 km waterline from Stettler to Consort constructed.
- 2012-2013 – Phase 2: 32 km extension from Stettler to Big Valley completed.
- 2013-2014 – Phase 3: 45 km extension from Stettler to Donalda constructed.
- 2016-2017 – Extension to Phase 1: 26 km expansion from Consort to Monitor & Pemukan.
- 2018 – Phase 4: 5 km extension from Donalda line to White Sands.
- 2018 – Phase 5: 27 km line from the Coronation Reservoir to Brownfield.
- 2021-2023 – Phase 6: 6 km extension from White Sands Truck Fill to Rochon Sands Bucket Fill, completed in three contracts.

Expansions in the Works:

- 2025 – Phase 7: 49 km waterline from Donalda to Bawlf & Rosalind now under construction.
- 2025-2026 – Phase 8: 39 km waterline from Pemukan to Compeer scheduled for construction.

THIS ARTICLE IS REPRINTED, WITH PERMISSION, FROM THE INAUGURAL ISSUE OF EMERGENCY MANAGER MAGAZINE.

Prepared Together

A Case Study in Community Readiness

By Scott Cameron, Co-Founder, EMLCanada

"Overwhelmingly, when we set out to ask local businesses and community organizations if they'd prefer to help or leave during a disaster, they want to help," says Clint Sime, director of emergency management for the Stettler Regional Emergency Management Agency (SREMA).

Having been deployed to support other Alberta communities during the 2023 wildfire season, Sime experienced first-hand the challenge of securing local resources and supplies without having access to current and accurate contact information – especially in situations where communities have been fully evacuated and external, trained personnel are on site making

critical decisions. In that deployment, the logistics section had to reach out to companies and organizations from outside communities, and that "did not sit very well with a lot of the local businesses that literally had equipment and people that would have been more than willing to come and help. We had no method of contacting them because all their phone numbers just went to the shops that were evacuated."

At that moment, it was clear to Sime that he wanted a different outcome for his community should they ever face something similar.

Located in east-central Alberta, SREMA is a regional partnership between Stettler County (pop.

5,666), the Town of Stettler (pop. 5,695), the villages of Donalda (pop. 226) and Big Valley (pop. 331) and the summer villages of White Sands and Rochon Sands (pop. 271). SREMA covers approximately 4,000 km² of prime energy (i.e., oil and gas) and agricultural lands subject to hazards such as adverse weather (drought, damaging winds, grassfires, etc.) and industrial accidents (rail, chemical, explosions, etc.).

As a member of the Central Region All-Hazards Incident Management Team (CRAHIMT), Sime is actively involved in regional deployments and exercises, making him acutely aware of the benefits to regional collaboration and co-ordination – not only with the other

60+ members of CRAHIMT from surrounding communities, but also with key businesses and organizations in his own community.

As part of his community-building approach, Sime connected with Byron Geddes, executive director for the Stettler Regional Board of Trade – a fellow champion of regional co-operation and collaboration. With insights from Sime's assessment of local assets needed to address regional hazards, the

two set out to meet with local business and community leaders, often simply walking in the front door to introduce themselves and inviting participation in the local emergency management program.

As they explained the benefits and value of an engaged community in building capacity and resilience, they also offered a quick and easy way to become involved. Armed with a letter of invitation and QR code to sign up for a

free local business profile on the EMLCanada platform, businesses and community organizations could initiate building and maintaining their own profile information accessible to SREMA team members and ultimately, other members of CRAHIMT or logistics section supports with the Alberta Emergency Management Agency (AEMA), should external supports be required.

"Local businesses want to be involved in emergency management," Geddes says. "They don't want to be standing outside the yellow tape wondering where the trucks and operators inside the disaster zone have come from – especially when they have the same equipment and operators knowledgeable and committed to the community. It does little to stimulate local economic recovery following a disaster or build trust in the community when outside resources are used, knowing local providers can do the same job."

Eugene Wells is the fire chief and CEO of Global Fire Rescue Service, a local Stettler business.

Abundantly familiar with fire fighting and the gas and oil sector, Wells notes that it's "huge to have the community involved before something happens. It's great to get input from the community itself, to create awareness, and it was important to see someone going around to find out what's going on." He adds that, "Too often, there is equipment like pumps, generators or trailers sitting in business compounds or on local farms that could be put into use, if only people took the time to know what is available."

Another key player in Stettler's emergency management program is the Clearview Public School Division. According to Sime, "schools have access to a tremendous inventory of public amenities and supports, including gymnasiums, commercial kitchens, caring staff and employees and transportation options." Assistant superintendent of human services Mark Siemens views the school division's involvement in the local emergency management program as essential to community resilience. "Schools are deeply rooted in their communities, not just as places of learning, but as trusted spaces where people naturally turn during times of crisis," says Siemens. "At Clearview, we recognize that our infrastructure, staff and connections can be a vital part of a co-ordinated emergency response."

In Alberta, the Canadian Red Cross is leaning into the value of community preparedness as part of its broader strategic policy agenda with a focus on partnerships to address the increasing financial, social and health impacts of climate change and disasters. Thu Parmar, vice-president, Alberta & Northwest Territories, regularly sees the benefits of supporting resilient communities and advocates for systemic changes necessary

Feature Article | Prepared Together

"Local businesses ... don't want to be standing outside the yellow tape wondering where the trucks and operators inside the disaster zone have come from."

Byron Geddes, Executive Director,
Stettler Regional Board of Trade

to improve response and recovery outcomes.

"At the Canadian Red Cross, we are actively working with private- and public-sector partners to strengthen our focus on preparedness in local communities. In Stettler, local businesses and community organizations have been able to take advantage of our work with Emergency Management Logistics Canada to access free profiles – something that is an important building block for deeper relationship building and engagement," Parmar says.

Word of Stettler's community approach to emergency management preparedness is getting around – especially in Alberta, with similar approaches emerging in communities like Banff, Canmore, Rocky View County, Cochrane and the

Bow Corridor, Westlock and Fox Creek. Other urban and rural communities are exploring innovative ways to engage with local businesses and organizations as there is growing acknowledgment that government alone cannot supply the resources, knowledge and expertise needed to address the severity and frequency that climate change and risk reduction are having on communities.

Caitlin Miller, director of emergency management for the Town of Canmore, says, "Community engagement and relationship building with local businesses and organizations just makes sense, and the sooner we start the process and build local capacity, the better equipped we will be to address the next disaster. It isn't a matter of if, but when." 🍀

STARTING DEVELOPMENT BEFORE APPROVAL?

APPROVAL FIRST, CONSTRUCTION SECOND.

Starting to clear land and build before obtaining development permit approval comes with significant risks. You may be faced with a financial penalty in the form of an additional fee or fine. You could also be required to undo all the work that has been done.

The County of Stettler requires development permit approval for most changes to property. This approval must be given in writing before construction of the development begins. Some forms of development, like agricultural buildings, do not require a development permit approval. These are listed in the Land Use Bylaw under the heading "Development Deemed Approved." If you are not certain about the permit requirements for your project please contact the County Development Officer at 403-742-4441.

The County's Fee Bylaw includes penalties for developments that are started before a development permit application has been

approved. Our policy is to apply these penalties based on a zero-tolerance approach. Our preference is to work with applicants as they plan their project.

Please contact the Planning and Development Department when you start planning your development in order to ensure you obtain the required development permit and other approvals in a timely manner. This could also avoid any expenses that you may incur if your idea for your development does not comply with the County's policies and bylaws (e.g. yard setbacks, road upgrades, etc.), so that you can make the necessary adjustments before you start digging or laying down concrete.

For further information, please contact the County's Planning and Development Department at 403-742-4441.

WHERE DOES FARM RECYCLING GO?

CleanFarms is a Canadian non-profit organization that focuses on agricultural waste management and recycling programs. They work collaboratively with various stakeholders, including farmers, industry partners, and government agencies, to develop and implement programs aimed at responsibly managing agricultural plastic waste.

environmental sustainability, reduce the environmental impact of agricultural practices, and ensure that these materials are recycled in an environmentally responsible manner. In 2021 farmers recycled more than 2,250,000 kg of the agricultural plastic containers less than 23L through the CleanFarms recycling program! This is a recovery rate of 77% of the agricultural plastics distributed in that year.

CleanFarms' programs typically involve the collection and recycling of various agricultural materials, such as pesticide containers, seed and fertilizer bags, and other farm plastics. These initiatives are designed to promote

But what happens to these plastics?

 <p>Containers up to 23L</p>		<p>Small containers are turned into clean flakes and used to make various plastic products, such as agricultural fence posts, drainage tile, and parking lot curb stops, among others.</p>		
 <p>Totes & drums</p>		<p>Bulk containers are turned into clean flakes and used to make various plastic items, including plastic pallets, drainage tile, and composite dimensional lumber among others.</p>		
 <p>Unwashed pesticides & livestock mists</p>		<p>Liquid and solid products are disposed of via high-temperature incineration at approved facilities in Canada or the USA. Plastic flakes are sent to manufacturers for use in making various plastic items as listed above.</p>		
 <p>Seed, pesticide & inoculant bags & large tote bags</p>	 <p>Grain bags</p>	 <p>Bale wrap</p>	 <p>Silage film</p>	<p>Other Ag plastics are used for alternative fuels, plastic bags and construction sheeting, car parts, flowerpots, new agricultural film plastics, and much more!</p>

Thank you for doing your part to recycle these Ag plastics!

2025 Gopher Impact Survey
Alberta

- Send us photos of crop damage
- Share your experience with control methods
- Aiming for 200 submissions!

<https://agriculturalserviceboards.com/2025-gopher-survey/>

Open until November 1, 2025

ASB
Provincial Committee

2025 ASB Gopher (RGS) Impact Survey

Richardson's Ground Squirrel (RGS) Impact Survey

The purpose of this survey is to gather information about the impact of gopher (Richardson's Ground Squirrel) on crop production in Alberta. It provides a clear and credible summary to the Minister of Agriculture and Agri-Food with the goal of encouraging timely action to support Prairie producers facing increasingly severe pest damage.

The Agricultural Service Board in Alberta and the Canadian Prairie Producers of Richardson's Ground Squirrel are working together to gather information about the impact of the gopher. It is not a scientific study, but rather a collection of anecdotal reports to provide information about the current situation.

Send us photos of crop damage or control methods you are using to control the gopher.

Send:

Richardson's Ground Squirrel (gopher)

Call to Action:

Gophers and the County of Stettler

2025 ASB Gopher (Richardson's Ground Squirrel) Impact Survey

This survey has been created to capture evidence on the impact of the current outbreak, and control methods. Federal MP John Barlow, the Shadow Minister of Agriculture, has asked the ASBs to provide this information on behalf of farmers.

"The purpose of this data collection is to provide a clear and credible summary to the Minister of Agriculture and Agri-Food, with the goal of encouraging timely action to support Prairie producers facing increasingly severe pest damage."

John Barlow, Letter to ASBs June 20, 2025

Photos of the damage are appreciated. Please consider uploading photos of the damage or loss (drone photos are great) in the survey or by email to admin@agriculturalserviceboards.com. Their goal is to receive at least 200 responses.

Share this information to help us reach as many farmers as possible.

**Posted on behalf of the Agricultural Service Boards Provincial Committee.*

CENTRAL ALBERTA MUNICIPALITIES UNITE IN EMERGENCY RESPONSE EXERCISE

Simulated Dickson Dam breach tests regional coordination and readiness

From satellite phones to mock press conferences, Central Alberta municipalities put their skills to the test on June 18 in a large-scale emergency training exercise titled “Cascade 2025” where municipal staff, first responders and utility providers came together to prepare for the worst-case scenario.

The fictional scenario, a full breach of the Dickson Dam resulting in significant downstream flooding and widespread utility disruption, united more than 120 participants from multiple municipalities and agencies, including the City of Red Deer, Red Deer County, County of Stettler, Kneehill County, and the Central Region All Hazards Incident Management Team (CRAHIMT).

Supported by a \$22,014 Emergency Management Preparedness Program (EMPP) grant from the provincial government, the training was a major milestone in regional emergency planning.

“This kind of cross-jurisdictional training is invaluable,” said Carol Lind, Emergency Management Coordinator for the City of Red Deer. “Emergencies don’t respect borders, so by working together across municipalities and agencies, we strengthen our ability to respond cohesively and effectively, which will ultimately help us protect lives, property and critical infrastructure.”

Realistic Scenarios, Real-Time Decision-Making

Each participating municipality designed a unique but coordinated approach, reflecting both local capacities and shared objectives.

- **The City of Red Deer** deployed both an Incident Command Post (ICP) and Emergency Coordination Centre (ECC), engaging 50 participants including Alberta Health Services, RCMP, CRAHMIT and 44 City employees. The team successfully completed Incident Action Plans (IAP) for both an Incident Command Post and Emergency Coordination Centre, establishing a Joint Information System with Red Deer County, and also tested backup communications like satellite phones and Starlink.
- **Over at Stettler County**, 46 regional staff set up an Emergency Reception Centre at the Stettler Community Hall while their Incident Command Post at the County Public Works Facility managed injects—simulated problem scenarios. Mock press conferences, evacuations and tours for elected officials added realism to the full-day simulation. Organizers called it a “strong success”, as it provided valuable opportunities for participants to gain experience, as well as tested regional partnerships with Clearview School Division, Starland County, AHS, RCMP and Alberta Transportation.

The County of Stettler would like to thank local media, including the Stettler Independent and Hometown Productions, for taking part in our exercise and holding a mock press conference to help prepare staff and elected officials.

- **Kneehill County** focused on internal capacity-building with a tabletop version of the exercise. Sixteen staff members ran through ICS (Incident Command System) roles and developed an IAP, while Council practiced their role in declaring a state of local emergency. The smaller-scale approach helped build internal confidence and laid the groundwork for a full-scale exercise next year.

- Meanwhile, **Red Deer County's** team operated from its Protective Services Station and successfully integrated 19 external agencies—including RCMP, EPCOR, AHS, schools and multiple utility providers—into a high-functioning ICP. A well-integrated Emergency Social Services team responded to simulated human-impact incidents, showcasing the critical role of wraparound support services in a disaster response.

Across all jurisdictions, the overarching goals were consistent: strengthen inter-agency communication, test the “Planning P” process (a standardized emergency response planning method), and refine real-time decision-making in complex, evolving scenarios.

“Emergency planning isn’t just an

administrative checkbox, it’s what ensures our communities can act quickly, communicate clearly, and support each other when every second counts,” said Carol. “By preparing together, we’re building more than just emergency plans. We’re building trust and teamwork across communities, which is critical when the pressure is real.”

WEED WATCHING 101

Burdock Species (*Arctium minus*, *Arctium tomentosum*, and *Arctium lappa*)

Common, Wolly, and Great Burdock

Designation: Noxious

Burdock is a weed in the sunflower family that grows up to 5 feet tall with a thick, hairy stem and large, heart-shaped leaves. In its second year, it produces purple-reddish flower heads that turn into prickly burrs, which inspired the creation of Velcro hook and loop fasteners.

Burdock plants have a magical reputation and have been used in European potions and spells for centuries. The roots were believed to provide protection, break hexes, and ward off evil. However, as an invasive weed, this plant can cause problems in undisturbed areas, including pastures, farmyards, roadside ditches, and streambanks.

This weed is best controlled using herbicide; however, it can also be controlled through repeated cultivation, or mowing.

Although this weed is uncommon in the County, we really appreciate your help in finding this weed. To report sightings of noxious and prohibited noxious weeds call the County at 403-742-4441. Please have a legal land location and area description ready when you call.

Look-a-Likes

Wild Horseradish

Armoracia rusticana

Unregulated

Distinguishing characters:

- leaves are more narrow
- when leaves are ripped out it will smell like horseradish

Arrow-leaved Coltsfoot

Petasites sagittatus

Unregulated

Distinguishing characters:

- underside of leaves will have a silvery color
- white flowers
- no burs

Burdock

ADVOCACY PRIORITIES

We continue to advocate for strong regional partnerships, resilient water and energy systems, fair funding arrangements, rural infrastructure investment, and municipal sustainability.

Mature Asset Strategy

The County of Stettler continues to express strong concern about the treatment of mature oil and gas assets within Alberta. Our region has long supported responsible resource development, and many of our communities were built on the strength of these energy investments. However, recent regulatory decisions and market pressures have created significant challenges for producers managing mature wells and facilities. We also have to consider what happens to expired solar panels and wind turbines and ensure the disposal obligation is looked after for ours, and for future generations.

We have advocated for policies that balance environmental responsibility with economic sustainability. Abandonment and reclamation obligations must be managed in a way that does not unfairly burden rural municipalities through reduced assessment values, unpaid taxes, or stranded infrastructure. The County has called for a more collaborative approach between the Province, regulators, and municipalities to ensure that mature assets are stewarded responsibly while still allowing for continued production, innovation, and reinvestment.

Our message is clear: mature assets are not liabilities when managed properly. With the right regulatory framework, they can continue to provide value, sustain employment, and support rural tax bases. We urge the Province to strengthen accountability measures for operators, while also creating pathways for viable producers to extend the productive life of wells and facilities. Protecting rural municipalities from the financial fallout of neglected or mismanaged assets remains one of our highest advocacy priorities. Reeve Clarke sits on the Mature Asset Strategy committee representing our position to industry and the Alberta Government.

Water Security

- Shirley McClellan Regional Water Services Commission (SMRWSC): Advocating for long-term support of one of Alberta's largest regional potable water systems, which was recently recognized with the Minister's Award for Municipal Excellence in the Partnership category.
- Joint Advocacy with County of Paintearth: Calling for enhanced provincial support for water security and rural infrastructure projects that sustain agriculture and communities.

Energy & Economic Stability

- Emphasizing the importance of safeguarding Alberta's energy sector while protecting municipalities from downstream impacts of regulatory decisions.

Fair Cost Sharing & Municipal Sustainability

- Reconsider cost-sharing responsibilities where municipal boundaries overlap.

Transportation Infrastructure

- Highway Investments: Thanking Alberta Transportation for recent improvements on Highway 855 (Byemoor/Endiang) and Highway 835 (north of Highway 12 to Buffalo Lake), while reinforcing the importance of continued provincial investment in rural transportation systems and infrastructure like bridges.
- Obtaining reclamation certificates for reclaimed gravel pits from Alberta Environment.

Regional Services & Partnerships

- Establishment of a Fire Commission: Promoting sustainable funding and support for the Stettler Regional Fire Department, highlighting the strength of regional cooperation in delivering essential emergency services. Continuing to emphasize the value of shared-service models that reduce costs and improve service delivery across municipalities like we do with Emergency Management and Stettler Waste Management.

BYLAWS AND POLICY UPDATE

Bylaw 1749-25: Adoption of County of Stettler-Town of Stettler Intermunicipal Development Plan

Bylaw 1749-25 proposes to adopt an updated Intermunicipal Development Plan (IDP) between the Town of Stettler and the County of Stettler. The updated IDP will replace the 2009 plan. The process to update the IDP began in 2021 and, after a pause to address the provision of water and wastewater services, the IDP Committee completed a draft plan in May 2025. Public review of the draft plan took place in June-July 2025.

During a joint Special Meeting, between the County and Town of Stettler, on September 15, 2025, a joint Public Hearing was held to discuss this Bylaw. At this meeting, both Council's have approved this Bylaw.

Bylaw 1750-25: Amendment to County of Stettler Municipal Development Plan

Bylaw 1750-25 proposes to amend the County of Stettler Municipal Development Plan (MDP). The amendment involves the regulation of confined feeding operations. It proposes moving the confined feeding operation exclusion zone, which is the area where new or expanded confined feeding operations are not supported by the County when providing input to the approval decisions of the Natural Resources Conservation Board.

The proposed MDP amendment is key to providing the Town of Stettler confidence that incompatible land use, due mostly to odour issues, is directed away from the town area.

Bylaw 1751-25 – Repeal of Southeast Area Structure Plan

This Bylaw proposes to repeal or cancel the Southeast Area Structure Plan (ASP). The Southeast ASP was adopted by the Town and County in 1989. It provides a high-level land use concept for the lands in the southeast part of the Town and the area of the County near the southeast corner of the Town.

This part of the process to update the intermunicipal development plan, the Town and County IDP Committee is recommending the repeal of the Southeast ASP. The reason behind the recommendation is based on the age of the plan in relation to current standards, the limited growth pressure that has been experienced since 1989.

QUICK COUNTY CONNECTION
BYLAWS & POLICIES *Get more info online*

Bylaw 1742-25: Golf Cart Bylaw

At the August 13, 2025 Council Meeting, Council passed a Golf Cart Bylaw. This Bylaw allows members of the public within the County of Stettler to obtain a permit to drive their golf cart on designated roads. See the map on page 25. As this is part of a Pilot Program, and under Council's direct, the subdivisions at Buffalo Lake are designated under this bylaw, as well as the connector between Bay View Street and White Sands.

Fees for obtaining a permit are specified in the fee bylaw and will be **remitted to and kept by the Summer Village of White Sands** as the fee for providing the registration service.

Leaves are Falling, Programs are Calling!

Stettler Public Library

As the seasons change, the library is bustling with programs to learn, create, and connect. From family films and creative workshops to cultural celebrations and community potlucks, there's something for everyone this fall at the library. Mark your calendars and join us, membership is free thanks to the support of the County and Town of Stettler.

Fall Program Highlights

- Film Circuit at the Library: Oct. 6 – Flow (family friendly) and Nov. 3 - The Seed of the Sacred Fig (PG-13) at 6:30 p.m. Enjoy critically acclaimed films on the big screen with fresh popcorn. Admission is free; donations gratefully accepted.
- PD Day Matinees: Sept. 29 - Snow White, Oct. 10 - How to Train Your Dragon, Nov. 10 - Lilo & Stitch, Nov. 28 - Bad Guys 2. All at 1 p.m. Popcorn included!
- Community Screening - Wilfred Buck: Sept. 29, 6:30 p.m. Join us for this uplifting documentary following "the extraordinary life of Wilfred Buck, who overcame hardship by reclaiming ancestral star knowledge".
- Spooktacular Book Sale: Oct. 6–11. Find

your next favourite read at the Friends of the Library's semi-annual sale. All items are by donation, with proceeds supporting library programs. Donations of gently used books are welcome until October 4.

- Thanksgiving Potluck: Oct. 11, 4–6 p.m. – Bring a dish to share and enjoy food, friends, and the spirit of community.
- Monster Bash Kids' Halloween Party: Oct. 25, 1-3 p.m. Dress up, play games, and enjoy seasonal snacks! Please call to register.
- Cheese Making with Ben: Nov. 5, 6:30 p.m. Learn the art of mozzarella making in this hands-on workshop. Space is limited – register early.
- Mocktails & Masterpieces: Nov. 21, 6:30 p.m. A guided paint night fundraiser with snacks and refreshments. \$25 per person. Please pre-register. Ages 18+

Alberta Culture Days & Orange Shirt Day

September is Alberta Culture Days, and Stettler is celebrating all month long with activities spotlighting Indigenous culture. On Saturday, Sept. 13, enjoy a

full day of events at the Museum (11 a.m.–4 p.m.). Then on Tuesday, Sept. 30, join us in recognizing the National Day for Truth and Reconciliation (Orange Shirt Day). Events for all ages will be happening at The HUB (11 a.m.–5 p.m.), with opportunities to learn, reflect, and honor the experiences of Residential School survivors. Visit stettlerculturedays.com for details.

Spotlight on Services for Print-Disabled Patrons

Did you know that print disabilities can be visual, physical, or cognitive (such as dyslexia)? They can even be temporary—like while recovering from cataract surgery, broken arms, or a stroke. If this applies to you, we can connect you with audiobooks and eBooks through NNELS or CELA. Ask us how—we're here to help make reading accessible for everyone.

Coming Soon

Wine Survivor: The Stettler Friends of the Library Society's popular fall fundraiser is back in November. Watch our website and social media and make sure to come in for a ticket or a few tickets. Maybe this year you will be the big winner!

Holiday Kids' Programming: We're planning festive fun to keep kids engaged and creative during the school break. Stay tuned for the full lineup of crafts, story times, and surprises from December 22 through January 3.

Stay Connected

Keep an eye on our website and Facebook page for the latest updates, and program announcements. If you would like to receive our monthly newsletter, please email spl@prl.ab.ca and let us know. To download our fall programming brochure, scan the QR Code.

COUNTY OF STETTLER COMMUNITY SERVICE AWARDS

48th Annual Awards in 2026!

The 48th Annual County of Stettler Community Service Awards will be held at the Westwoods Agricultural Society in spring of 2026.

This event celebrates the outstanding contributions of our volunteers in Agriculture, Recreation and Arts and Culture. On a yearly basis, there are two awards that are presented to individuals or couples through a nomination process:

The Stettler Dodge Community Service Award is awarded to volunteers who have shown outstanding community leadership in recreation. All nominees are considered to be hard working, community minded people who have contributed greatly to recreation in their community.

The ATCO Electric Arts, Culture and Heritage Award is awarded to volunteers who have shown outstanding leadership and commitment to the cultural aspects of their communities (coaching, teaching piano, or educating the community in various aspects of art and culture).

If you would have someone in mind that you would like to nominate for these awards, please submit your nominations to Lorraine Hankins – Manager of Recreation and Insurance at the County of Stettler No. 6 prior to January 31, 2026. More information regarding tickets and location can be found on the County website www.stettlercounty.ca in the New Year.

SAVE A TREE!

Important Deadlines in the County of Stettler

Mark your calendars

- Shelterbelt Orders – March 31
- Dust Reduction Applications – April 30
- Spray Exemption Applications – May 1
- Haying Ditches Applications – June 1
- Temporary Grazing of Right Aways Applications Accepted May 1-October 30
- Snowplowing Laneways Applications – October 31
- Taxes Due: October 31, 2025

For more information on these programs contact PW@stettlercounty.ca or call 403-742-4441 or visit www.StettlerCounty.ca
